New electronic soap dispenser

Electronic liquid soap dispenser

Design: available in 4 finishes

Ref. 512566P

The DELABIE Group, an expert in accessibility in public places, has launched its new electronic soap dispenser in a 0.5 litre version. Its aesthetic lines and functionality make the dispenser essential in public and commercial washrooms.

Design

Available in four finishes - bright polished, polished satin, matte black and white-powder coated stainless steel - this new electronic soap dispenser fits perfectly with different styles of interior decoration.

Total hygiene

Hand washing is the basis of good hygiene and an effective measure against bacteria. Electronic controls reinforce this efficiency.

Hands are detected automatically by an infrared sensor. The detection distance can be adjusted to prevent any contact with the dispenser and, therefore, avoid any contamination through manual contact.

Like the majority of DELABIE's accessories, the lid of this dispenser is made from bacteriostatic 304 stainless steel.

The surface remains hard, bright and smooth, making it difficult for bacteria to adhere.

Easy to clean

This new dispenser has been designed to meet one of the fundamental principles of hygiene in public places: daily cleaning. The one-piece, hinged cover is smooth, so it is easy to clean and there are no niches where bacteria can develop.

The soap tank prevents the soap from stagnating permanently, ensuring maximum hygiene.

Designed for public places

The number of doses of soap per activation can be adjusted. The no-waste, non-drip pump dispenser cannot be blocked in the open position, and delivers just the right amount of soap per activation.

Equipped with a lock and standard DELABIE key, any attempt at theft, which occurs frequently in public washrooms, is prevented. This key, which is compatible with the majority of DELABIE's hygienic accessories, simplifies servicing for the maintenance staff.

The detection system uses very little energy, which extends the lifespan of the batteries up to 300,000 cycles.

The low-battery life indicator and the level-control window optimise maintenance. The tanks is situated above the battery compartment, so refilling the tank is simplified.

PRODUCT BRIEF / DESIGN & TECHNOLOGY FOR OPTIMAL HAND HYGIENE

The DELABIE Group, an expert in accessibility in public places, has launched its new electronic soap dispenser. Its aesthetic lines and functionality make the dispenser essential in public and commercial washrooms.

With no manual contact, and made from bacteriostatic 304 stainless steel, total hygiene is guaranteed. It is ideally suited to public places with its no-waste, non-drip pump dispenser, its standard DELABIE key and a battery life up to 300,000 cycles.
