The TEMPOMATIC 4 recessed urinal provides an innovative waterproof system, patented by DELABIE. This new concept combines design and functionality: the electronics are directly integrated into the plate.

Water saving

Thanks to its optimised flow rates and timing settings, the TEMPOMATIC 4 offers the right volume of flush required and therefore the best compromise between water consumption and efficiency. DELABIE has developed an « intelligent » urinal valve capable of detecting busy periods and adapts its rinsing accordingly. During these periods the water volume is reduced so that only the urinal bowl is rinsed between two users. At the end of the busy period, an additional rinse takes place to clean the urinal completely and renew the water in the trap and the pipework.

Hygiene

The flush of the TEMPOMATIC 4 recessed urinal is automatically triggered when each user leaves. The absence of manual contact prevents the transmission of germs by hand. The periodic duty flush reduces bacterial proliferation and the phenomenon of disappearance of water in the siphon. The TEMPOMATIC 4 is supplied with a reduced stagnation solenoid

Design

The TEMPOMATIC 4 wall plate has a timeless design, available in chrome, brushed, white or black finish. Thanks to its sleek lines, it fits perfectly in any type of public building. Its smooth surface limits the build-up of dirt and facilitates cleaning.

Easy to install

There are many ways to install the box: mounting from the sides on plasterboard rails, from the front on a solid wall or from the back on a panel. This cut-to-size housing is the only product on the market that can adjust to thick walls or thin partition walls. It can be installed on partitions of up to 120 mm: thick walls (brick and cinder block) for commercial washrooms exposed to frequent vandalism. The TEMPOMATIC 4 recessed urinal connects from the outside of the housing.

Secure system flush

During installation, the sensible elements (solenoid valve, filter or stopcock) are replaced by a temporary cap to facilitate and secure the system flush.

Waterproof housing

Conventional housings available on the market can be cut to be level with the wall which increases the risk of leaks. DELABIE has developed a housing that can be cut to size in front of the collar which ensures a perfect seal. The waterproof seal is integrated into the collar. No additional operations are required for the installer (silicone, etc.). The housing has notches to clip the collar onto and fix it in place easily (patented system).

Minimal servicing and easy to maintain

The solenoid valve, filter and stopcock are accessible from the front with no need of removing the housing. Simply remove the wall plate to get access. For frost protection and in-depth maintenance, the flush valve can be disconnected and removed from the inside, without removing the housing.

WINNER OF MULTIPLE AWARDS:

The TEMPOMATIC 4 black glass won the "Selection" award at the 2019 ICONIC AWARDS

PRODUCT BRIEF / TEMPOMATIC 4 RECESSED URINAL

Design and functionality at the service of public and commercial places

DELABIE's new recessed electronic urinal valve offers the best compromise between reduced water consumption and efficient rinsing. The wall plate has an uncluttered design and fits to any type of public or commercial building. The same housing can be installed in various ways: on plasterboard rails, solid walls or panels. The waterproof seal is achieved thanks to a patented system for cutting the case in front of the collar. To facilitate maintenance, the sensitive elements (solenoid valve, filter and stopcock) can be accessed from the front without having to remove the housing. 10-year warranty.

DELABIE, manufacturer's expertise

DELABIE, a 100% family-owned French company, founded in 1928, is the European market leader in water controls and sanitary equipment for public and commercial places. The company offers five product ranges specifically for this market: Commercial water controls, Hospital water controls, Accessibility and Hygienic accessories, Stainless steel sanitary ware and Specialist water controls.

Over 2,000 DELABIE manufactured items, including international references, are exported from its factory in France to more than 90 countries.

The company has 9 subsidiaries worldwide: Germany, Austria, Benelux, United Kingdom, Spain, Portugal, Poland, United Arab Emirates (Dubai) and China (Hong-Kong).
